

THE DIGITAL BIRD MUST FLY

A Proposal for an Agile, Human-Centric 18th SDG Beyond the 2030 Framework

Space Renaissance International 4th World Congress
July 2, 2026 - Day 3 - Session: Space 18th SDG Coalition

Speaker: Veronica Chiaravalli

Founder, CEO & CRO, Emerging Technologies Sweden

vc.multiplanetaryx@gmail.com

The World Has Changed

The World of 2015 vs. The World of 2026

Core Comparison:

- 2015 Framework: Linear planning, industrial assumptions, and 15-year targets.
- 2026 Reality: Exponential acceleration. Embodied AI and social robots are actively leaving laboratories and entering human environments.
- The Stagnation Risk: We cannot place a supersonic digital goal inside slow-moving legacy bureaucratic machinery.

The True Nature of Co-Creation

Co-Creation vs. Outsourcing Intelligence

Core Concepts:

- Generative AI proves daily that machines can originate content.
- True evolutionary power emerges when we couple human intuition with machine exploration.
- The Strategy: Human meaning-making + machine pattern-finding. We must actively exercise our creativity rather than outsource it.

The Policy Paradox

Supersonic Technology, Legacy Maps

Core Concepts:

- Bureaucracy relies on five-year regulatory cycles that are instantly outdated.
- Attempting to shoehorn rapid technological shifts into the old Agenda 2030 framework creates an operational chokehold.
- The Solution: The 18th SDG must exist as a separate, agile, and adaptive protocol.

The Geopolitical Horizon

Navigating Global Uncertainty

Core Concepts:

- By the time 2030 arrives, the geopolitical and technical landscapes will be unrecognizable.
- The 18th SDG must be portable, resilient, and non-coercive.
- Creating a decentralized framework that organizations and nations choose to join because it natively elevates their capabilities.

Replacing the Static Map

Navigating with a Living Map

Core Concepts:

- Legacy systems navigate a supersonic world with a horse-drawn map.
- We must build a living, updating map that displays multiple routes to a variety of destinations.
- Human agency, critical thinking, and cognitive dignity must sit securely at the center of the architecture.

Closing & Personal Contact Details

Give the 18th SDG the Freedom to Innovate

Let us empower a new generation of leaders to co-create a future where humanity truly flourishes. The bird is ready. It is time to open the cage.
