

MOTION ON THESIS 1

The Session Chair moves to vote on the Congress Thesis 1 “Status of Civilization and Quality of Life”, referring to the presented paper¹ and of the presentation² given by the author, on behalf of the co-authors. Namely we underline the following Thesis 1’s elements:

2026 Status of civilization.

- Changes in the current situation compared to 2021
- Status of the UN 17SDGs
- Resources – The Overshoot Day
- Energy
- The “rare” elements
- Geopolitics and civilizational global risk
- Environment
- What makes the need for expansion more evident

2 Perspective of human expansion into outer space.

- A beautiful life in space – space habitats design on humanist requirements.
- Some urgent advances, science, technology and policy.
- Redundant and humanist design.
- Space waters management.
- Protection from solar and cosmic radiation.
- Simulated gravity, general concept.
- Simulated Gravity Orbital Station.
- Island Zero.
- Space-to-space vehicles.
- Geo-lunar industrialization – the Lagrange Space Factory.
- Orbital Debris and Space Traffic Management: From Problem to Opportunity through Urgent New Solutions and In-Orbit Recovery and Reuse.
- Lunar and asteroid mining, producing propellant and construction materials in space.

Space Resources

- Space resources should not become a field of new colonial extraction or militarized competition, but should primarily support peaceful civilian space development, future space communities, and the expansion of human life, freedom, and quality of life beyond Earth.

Space Policy: A Sustainable Civilian Future in Space.

- We speak for the Space Settlers.
- Protection of Human Life and Health.
- Equitable usage of space.
- Prevention of an arms proliferation in outer space.

Space Communities’ Governance

- How humans will make decisions, manage shared resources, and maintain law outside Earth.

Peace on Earth, and beyond

Space as Inspiration for peace, love and compassion.

- From mythology to our days, sky is no more a limit.
- Renaissance, Enlightenment, Romanticism, and Humanist Space Philosophy.

The Space Renaissance, a new, feasible, eutopia

The approved SRI 2026 Congress Thesis 1’s elements will consolidate the Space Renaissance Credo and the rationale for SRI future actions and campaigns.
